EXPERTISE

AI Integration & Orchestration

Generative AI Solutions

Prompt Engineering

LLM Gateway Architecture

Agentic Workflows

Google Gemini & OpenAI APIs

Dynamic Webhooks Integration

Python & Odoo Customization

Java & Spring Boot

Microservices Architecture

PostgreSQL & SQL Tuning

Docker & CI/CD

EDUCATION

**Bachelor of Technology
(B.Tech)**

PROFESSIONAL SUMMARY

A highly analytical, results-driven AI Solutions Architect and Full-Stack Developer with a track record of bridging the gap between cutting-edge LLMs and real-world enterprise architectures. Specializes in building secure, high-availability data ingestion networks, semantic auto-reply engines, and custom ERP workflows that maximize organizational efficiency.

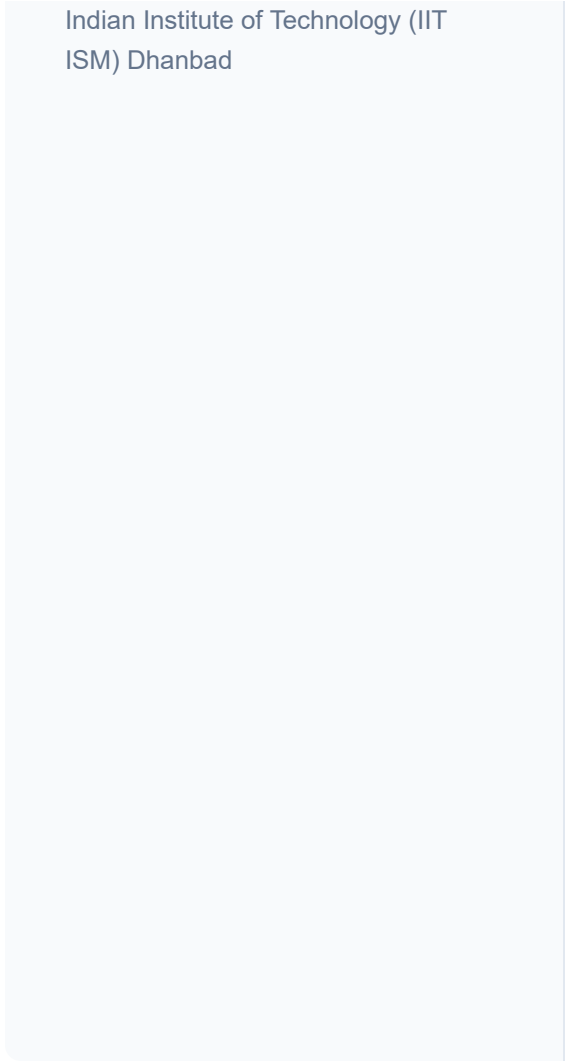

PROFESSIONAL EXPERIENCE

Lead AI Integrations & Software Engineer

June 2025 - Present

[Freelance / Self-Employed](#)

- Designed and developed a unified communication hub consolidating WhatsApp, Gmail, Facebook Pages, and Instagram Graph API.
- Engineered a local Evolution API WhatsApp connector (using Baileys WebSocket web engine) that bypassed Meta fee structures, saving the business 100% in API transaction fees.
- Constructed a highly resilient dual-gateway AI router utilizing Google Gemini 1.5 Flash and OpenAI GPT-4o, automating client inbound message categorization, semantic tagging, and smart reply creation.
- Implemented Odoo long-polling backend hooks (built-in Bus framework) to broadcast real-time toast alerts to active CRM coordinators, resulting in a 40% reduction in response latency.

Indian Institute of Technology (IIT
ISM) Dhanbad

**Java & Android Software
Developer**

June 2024 - May
2025

Enterprise Software Solutions

- Architected resilient backend microservices utilizing Java 17, Spring Boot, Spring Cloud (Eureka, API Gateway), and PostgreSQL.
- Constructed highly secure REST APIs, handling strict transactional safety, database query lock tuning, and selective connection pooling to decrease database response times by 35%.
- Programmed native Android client applications utilizing Android SDK, Kotlin, and Room DB for persistent offline caching.

KEY PROJECTS

We Smart Communication Engine

An enterprise-grade, multi-channel webhook router in Odoo 19 that consolidates, translates, and summarizes client incoming payloads from WhatsApp and Meta Graph APIs using LLMs.
